

YASHWANT MANHAS

Data Analyst/Business Analyst

Yashmanhasofficial@gmail.com
Noida, UP

Transforming business data into actionable insights through analytics and visualization.

About Me

I am a Business Analyst with nearly 4 years of experience in business analysis, operations, reporting, and process improvement within startup environments. I enjoy translating business requirements into practical, data-driven solutions that enhance efficiency and support informed decision-making.

Skills

- Business Analysis
- Data Analysis
- Requirement Gathering
- BRD / FRD
- Excel
- SQL
- Power BI
- Python
- Stakeholder Management
- Process Improvement

My Projects

AI Decision Copilot

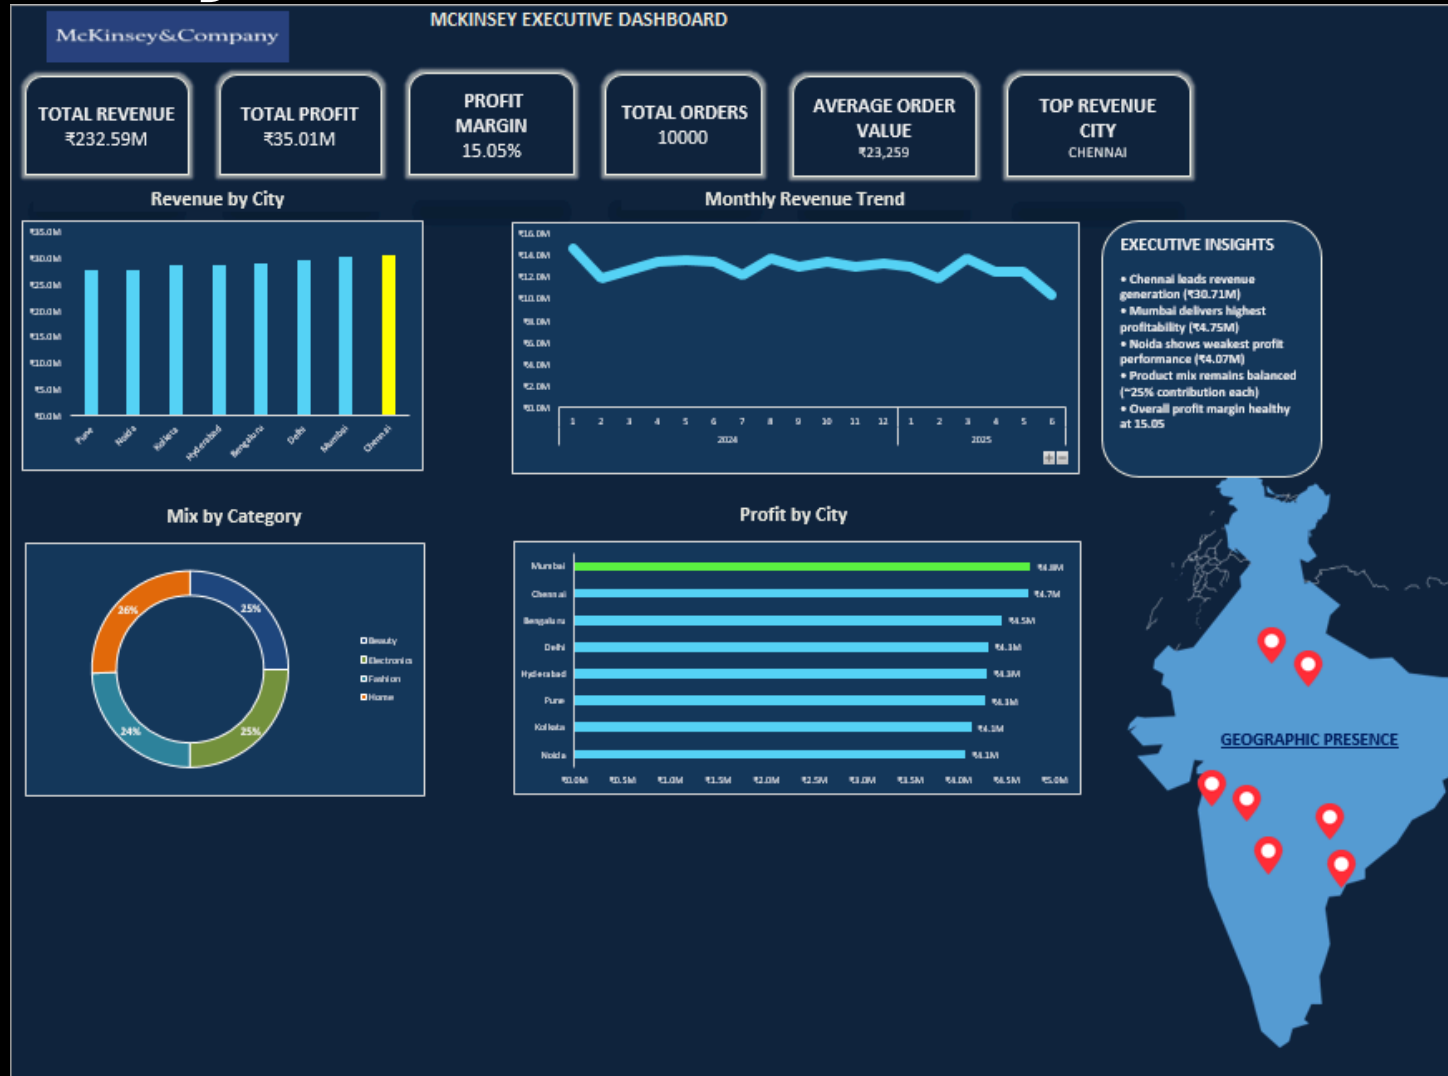

Developed an AI-powered Executive Decision Copilot dashboard to support strategic business decision-making through interactive analytics and intelligent insights. Integrated executive KPIs, revenue and profit analysis, regional and category performance, and risk monitoring into a unified dashboard

[illegible]

Real-Time Supply Chain Performance Overview

My Projects

McKinsey Executive Dashboard

Developed an executive business dashboard in Microsoft Excel inspired by McKinsey-style reporting principles to deliver clear, actionable business insights. Built interactive dashboards using Pivot Tables, Pivot Charts, Power Query, slicers, and advanced Excel formulas for dynamic reporting.

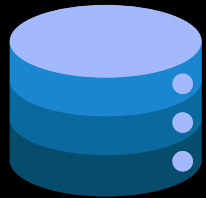

My Projects

Built an end-to-end S&P 500 market analytics solution using Python and Power BI. Performed data cleaning, EDA, feature engineering, and developed interactive dashboards with executive KPIs, sector analysis, company insights, and AI-assisted decision support.s

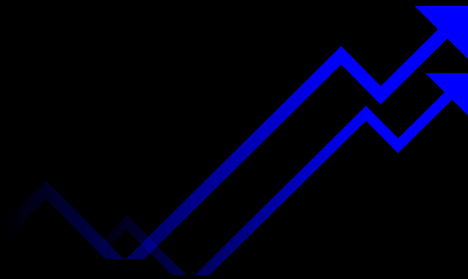

S&P 500 Analysis

What I Do

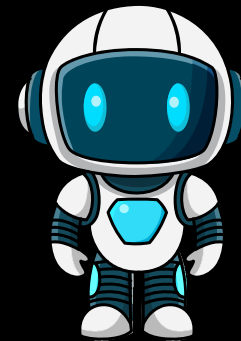

Data Analytics

I transform raw data into meaningful insights using Excel, SQL, Python, and Power BI. I build interactive dashboards and reports that help organizations make informed, data-driven decisions.

Business Analytics

I analyze business processes, gather requirements, prepare BRD/FRD documents, and identify opportunities to improve operational efficiency through data-backed recommendations and stakeholder collaboration.

Business Intelligence

I design executive dashboards, KPI scorecards, and AI-driven analytics solutions that monitor performance, identify trends, and support strategic decision-making across business functions.
